

VICTORY RUN

PC ENGINE

The first road-racer to appear on the PC Engine, and still one of the best. Kit your shiny speedster out with extra brake pads, gear boxes, etc, then drive it across Europe to Africa, trying not to crash too often on the way, so you can reach the next checkpoint in time.

The 3D is fast and convincing, and the other cars and lorries are nicely drawn, though sometimes the scenery is a little bland. However, the game demands a fair degree of driving skill, so if you're after a driving game this is worth taking out for a spin.
